 White | Gray | Black

100% Water & Termite Proof

Structure:-

THOMSON Bubble Guard POLY Panel is a multi-layer sandwich board made from eco-friendly polypropylene with two flat faces on both side and a special circular bubble structure between them to provide high stiffness and rigidity with bi-directional strength. This Unique core provides an air-lock technology for a cushioning effect to ensure a high strength-to-weight ratio, making these boards tough and durable, yet lightweight.

THOMSON POLY Panel is a multi-layer board made from 100% polypropylene with a unique structure core at the centre and two flat surfaces on either side with great versatility and high performances. It is 100% eco-friendly & recyclable.
